

Endian UTM Mini 10

La nuova generazione UTM hardware

Adatta alle piccole imprese e agli home office, ma perfetta anche a completamento di grandi progetti, Mini 10 è la nuova appliance UTM entry level di Endian.

Mini 10 è l'apparato di sicurezza ideale per le attività produttive con un ristretto numero di collaboratori. Il dispositivo, infatti, garantisce ad un prezzo contenuto tutte le funzionalità necessarie alla protezione del perimetro informatico.

Ma Mini 10 trova un'ottima collocazione anche all'interno di progetti grandi e articolati dove, oltre ad una appliance Unified Threat Management (UTM) principale e centralizzata, è necessario inserire anche macchine più compatte, da collocare presso sedi distaccate o a protezione di specifici macchinari.
